Re: *Ex Parte* Notification, E.T. Docket No. 03-137

Dear Ms Dortch:

On November 17, 2004, Thomas Goode, Director of Government Affairs for PCIA, The Wireless Infrastructure Association (PCIA), and Connie Durcsak, PCIA's Senior Director for Government and Industry Affairs, met with Bruce A. Romano, Associate Chief/Legal Counsel, Office of Engineering and Technology (OET) and Robert F. Cleveland, Jr., PhD, Physical Scientist, OET, in the above-referenced proceeding.

PCIA reiterated issues addressed in its comments in this proceeding, noting that the health effects of radiofrequency (RF) exposure have been raised at local zoning hearings to frustrate wireless infrastructure deployment. PCIA urged the Commission to clearly emphasize in its decision in this proceeding that wireless facilities that comply with the Commission's RF rules pose no danger to human health from excessive RF exposure. PCIA also asked the Commission to emphasize that its current and proposed RF guidelines incorporate appropriate margins of safety. Finally, PCIA outlined its efforts to educate its members and local zoning authorities regarding this issue, including the creation and distribution of a model Wireless Telecommunications Ordinance.

Pursuant to Section 1.1206(b) of the Commission's rules, this letter is being filed electronically for inclusion in the public record in the above-captioned proceeding.

Respectfully submitted,

Thomas Goode
Director of Government Affairs

cc: Bruce A. Romano
Robert F. Cleveland
